

Merlin Taxidermy Tool Set Accessories in Action

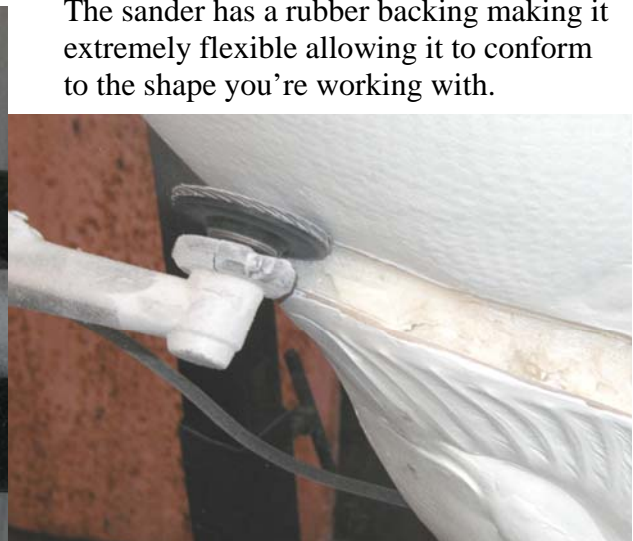

Aluminum Oxide Cutting Disc

The cutting disc accessory is an excellent tool when working with material like fiberglass. The photos show the disc being used to remove the excess fiberglass material at the seams, fins, gill and mouth area of a fiberglass fish form. Given the precision cutting ability of the disc you can take the seam down to within a sixteenth of an inch. Final sanding can easily be accomplished using the Flap Disc Sander.

100 Grit Flap Disc Sander

The sander has a rubber backing making it extremely flexible allowing it to conform to the shape you're working with.

Stainless Steel Fleshing Blade

The fleshing blade is designed to work with all types of hides such as deer, wild hog, gator, most small and large mammals.

The fleshing blade works well with both green and tanned gator hides. The blade allows you to work each scale (shute) with ease and precision.

The fleshing blade makes quick work de-fleshing a wild Boer hide.

Tungsten Carbide Abrasive Disc

You're going to find a lot of different applications with the Carbide Abrasive Disc. Depending on your task you'll find the disc to help in de-fleshing, form sculpting,

This picture shows just how easy it is to use Merlin. You're going to create some dust but that's the

8—Tooth Chain Saw Disc

The "Worlds Smallest Chainsaw Blade" can be applied to a lot of different tasks. You'll love it when working on habitat and presentation material. Here's an example of something a little different.

In this picture the disc is being used in the construction of an antler chandelier.

The disc is being used to notch a trench in the top side of an antler for the electric wiring. The width of the cut is ideal for this application.
